

MAAS[®] Customer Reviews

As one of the official merchandisers of General Motors licensed parts and accessories for Corvette, we find MAAS AUTOMOTIVE SYSTEME to be of superior quality. From the fiberglass body to the chrome bumpers and wheels, MAAS products provide a remarkably deep, reflective mirror finish.

Sincerely, Nathan

Normally I don't write letters of a testimonial nature. However, this one is the exception. For over 70 years, I have endeavored to polish various metals on my boats, autos, and other personal property. Among the products used were Dupont, Flitz, Brasso, Haggerty's Wrights, Nev-R-Dull, Boyer, Iosso, Simple Green, et al, et al.

I read the recent article in the Daily Harold about your product and went that very day to look for MAAS polish, found it tried it on some badly tarnished brass. Walla! Be prepared for merger and buyout offers in the near future,. You've struck a sweet chord with this development.

Very truly yours,

James R. Ogborn & Co., President
Consultants to Management

I have been using MAAS metal polish on my boat's stainless steel and aluminum for the past year. This product beats everything else that I've ever used hands down. I have recommended it to my boating friends and to an associate who details boats for beer money. Everyone agrees that MAAS metal polish is easier to use, does a better job, and lasts longer than every other marine metal polish on the market. The best part is that it's a price performance winner. A single tube does all of the metal on my 30^{ft} sportfisherman 3 times. Try that with anything else that's available in the marine stores.

Keep up the good work, I love the stuff! -Dave

I have used many metal polishes over the past few years, and I would like to let you know that I firmly believe MAAS is the best. No other even comes close! I am involved with horses, and for the past several years have worked in a few different barns. Each barn I worked at used a different metal polish. Some I thought were pretty good, and some were mediocre. It wasn't until I started working at a stable in Maryland that I became aware of MAAS Metal Polish. The owner of that barn was pleased with the performance of your polish, and requested that I use it on all the hardware on her saddlery. Was I impressed! I had never before seen such a brilliant mirror finish – and so easily!

When I moved back down here to Texas , I vowed that I would find some MAAS to use on my own items. I could not find it anywhere. Then one day I got a catalog in the mail, and to my surprise, the polish was in there. I ordered a tube, and have been happy ever since!

I am so impressed with MAAS Metal Polish. You have found a lifelong customer in me, and I thank you for making such a quality product.

Sincerely, Alicia

Sometime ago, I heard Clark Weber on the WAIT Radio Station highly recommending the MAAS Polishing Crème. Well, I thought I'd try it, as I hadn't had the best of luck with other polishes. At a Dominick's, I asked a lady employee as to where I could find the MAAS Polishing Crème, as I heard the wonders of this polish on the WAIT Radio Station. She said she'd try it also. I saw her at the store another time. She thanked me and told me how delighted she was with MAAS .

So, on Friday February 19th, I called WAIT Radio Station and spoke with Clark Weber on the air “to comment about MAAS , the inexpensive polishing crème for all metals and glass with it's cleaning and protective agents, and that it is the best I've ever used.”

“My old brass lamp came back to life, and even seemed to make the bulb shine brighter (and me, too). My friends and relatives couldn't help but notice the restored beauty to my old lamp. Thank you for a wonderful product.”

Sincerely, Mrs. Strzelecki

We recently ordered another case of your Maas Polishing Crème. I cannot tell you what an outstanding product this is. Today the head of our Equipment Department handed me a box filled with damaged silver. Most was ruined due to washing in abrasive cleaner. We decided to try Maas Polishing Crème just to see if we could restore the pieces. We were amazed! Almost every piece has been returned to our inventory. You have a product that every caterer needs to have. As a member

of the National Caterers Association, I think many of my colleagues would be very interested in receiving information...

Sincerely, Maxine

I must tell you that this stuff is by FAR the BEST thing I have EVER discovered. After using a powder polish on my platinum wedding band and taking it to a jeweler (who told me the finish was destroyed), I used MAAS on the ring and amazingly it looks brand NEW. The jeweler who I brought it to originally could not believe that the ring could be shined again after the "powder product incident" and told me I would have no choice but to have the ring refinished (which would have cost in excess of \$200). However, one 2 oz tube of MAAS and \$5.00 later, my ring looks great!!!

Amy

I received a very expensive watch as a gift, and from daily wear, it began to look dull and worn. I got in my car, on my way to a jeweler to have it professionally cleaned and buffed, when I remembered how well MAAS Polishing Cream worked on all the metals on my automobile. I decided to try it on my watch, because if it didn't help, I could still have it professionally cleaned. Wow! Not only does my watch look brand new, Maas seemed to leave a protective coating on it, that keeps it looking that way. I would highly recommend Maas Polishing Cream for all fine jewelry.

Thanks for a great product! W. Krol

You are the best! We've lived aboard our boat for 11 yrs, and have tried every brass cleaner there is. Again, you are the best! As you can see from my picture, the dirty one, is 6 years of neglect. They both came out like new. I'll be your most free advertiser in our area.

Thank you!
